DEFINITIONS

1 **Total Loss** For the purpose of Lloyd's Register Casualty Return the term 'Total Loss' refers to a merchant ship which, as a result of being a marine casualty, has ceased to exist, either by virtue of the fact that the ship is irrecoverable or has subsequently been broken up. Ships which have been declared constructive total losses but which are undergoing or have undergone repairs are not included. Ships of less than 100 gross tonnage are not included in the Return.

2 **Casualty Categories** are defined as follows:

Foundered Includes ships which sank as a result of heavy weather, springing of leaks, breaking in two, etc., but not as a consequence of categories listed below.

Missing After a reasonable period of time, no news having been received of a ship and its fate being therefore undetermined, the ship is posted as 'Missing' at the Corporation of Lloyd's and is included in the Missing category on the data base together with similar cases reported by other reliable sources.

Note: In peacetime, missing ships are considered as losses occasioned to ships by marine perils.

Fire/Explosion Includes ships lost as a result of fire and/or explosion where it is the first event reported.

Note: It therefore follows that casualties involving fires and/or explosions after collisions, stranding, etc., would be categorised under 'Collision', 'Stranding'.

Collision Includes ships lost as a result of striking or being struck by another ship, regardless of whether under way, anchored or moored. This category does not include striking underwater wrecks.

Contact Includes ships lost as a result of striking an external substance but *not* another ship or the sea bottom (*see* categories 'Collision' and 'Wrecked/Stranded'). This category includes striking drilling rigs/platforms, regardless of whether in fixed position or in tow.

Wrecked/Stranded Includes ships lost as a result of touching the sea bottom, sandbanks or seashore, etc., as well as entanglement on underwater wrecks.

Lost, etc.

(i) **War Loss/Damage during Hostilities.** This category also encompasses loss occasioned to ships by hostile acts.

(ii) **Hull/Machinery Damage** Includes ships lost as a result of hull/machinery damage or failure which is not attributable to any other category.

(iii) **Miscellaneous** Includes ships which have been lost which, for want of sufficient reasons, cannot be classified.

3 **Date of Casualty** The date of casualty is that on which the first reported event of the casualty occurred.

Summary of Total losses during 1987

The total tonnage lost during 1987 (1,284,161 gross tonnage) showed a decrease of 1,324,574 gross tonnage over the figure for 1986; the number of total losses (219) is the lowest since 1964. Comparisons over a period of fourteen years are shown at the end of Table 1.

The largest ship totally lost during the year was the Cypriot steam tanker LADY A (114,086 gross tonnage, built 1975).

Foundered The number of ships that foundered during 1987 (101) was two more than the previous year. Over thirty-seven per cent of these were twenty years old or more. The tonnage lost in this category showed an increase of 212,232 to a figure of 395,217 gross tonnage: the highest recorded since 1980.

The oldest ship totally lost during 1987 was in this category. It was the U.S.S.R. steam passenger/general cargo ship MORSKAJA II (5,878 gross tonnage, built 1913) which sank at Busan whilst awaiting demolition.

Notable losses in this category included the British passenger/ro-ro cargo/ferry HERALD OF FREE ENTERPRISE (7,951 gross tonnage, built 1980) which capsized off Zeebrugge. One hundred and ninety-three persons were reported killed or missing. The ferry was sold for demolition at Kaohsiung, renamed FLUSHING RANGE and reflagged for her final voyage. On two occasions during storms her tow line parted, the first in October and again off South Africa in December. In June the Hong Kong registered bulk carrier CUMBERLANDE (21,384 gross tonnage, built 1973) carrying a cargo of manganese ore, foundered after Nos. 1 and 2 holds began taking water in heavy weather. The crew spent almost two days pumping water from the vessel before the captain took the decision to abandon ship. Eleven days later the Panamanian bulk carrier DAYSRING (13,373 gross tonnage, built 1970), also carrying manganese ore, foundered in heavy weather. Of the seven other bulk carriers featured in this category, three foundered whilst carrying cargoes of scrap iron, two were transporting iron ore and the remaining two parted tow and were assumed foundered whilst on delivery voyage to breakers.

Missing Four ships were reported as missing during the year. Tonnage in this category totalled 40,994 gross tonnage, mostly accounted for by the Liberian motor bulk carrier CATHAY SEATRADE (32,027 gross tonnage, built 1973). This ship was on voyage from Buchanan to Emden with a cargo of 50,020 tonnes of iron ore. Also lost was the Mexican general cargo ship TUXPAN (8,350 gross tonnage, built 1982) on voyage from Bremen to Tuxpan with a cargo of containers. Both vessels were last reported encountering heavy weather. Seventy-eight lives were lost on the four vessels reported in this category.

Fire/Explosion Gross tonnage totally lost in this category during 1987 was 95,672, the least tonnage lost since 1970 and a decrease of 208,389 gross tonnage over 1986. The number of losses in this category fell to twenty-seven, twenty fewer than recorded for 1986. It is also notable that not a single tanker is recorded in this category. Of the twenty-seven incidents recorded, nine were attributable to engine room fires or explosions, three in cargo areas and three in accommodation. In the remaining twelve incidents location was not reported. Nine of the twenty-seven incidents occurred while vessels were in port.

One notable loss in this category was the Panamanian general cargo ship CASON (9,191 gross tonnage, built 1969) which was extensively damaged by fire and explosions. Fire rapidly spread

through the cargo area where thousands of drums of dangerous chemicals were stored. Twenty-three crew members drowned in rough seas after deciding to abandon ship. The vessel stranded at Punta Rostro, near Finisterre where some of the cargo was washed ashore. Salvage proved particularly difficult owing to the prevailing weather conditions and the nature of the cargo.

Collision Total losses through collision increased to twenty-four ships of 96,031 gross tonnage, the highest tonnage lost since 1981.

The most notable incident in this category was the collision between two Philippino vessels, the ferry/general cargo ship DONA PAZ (2,324 gross tonnage, built 1963) and the tanker VECTOR (629 gross tonnage, built 1980) on the 20th December. The ferry, on voyage from Tacloban to Manila and fully loaded with passengers, collided with the tanker which was carrying cargo of petroleum products 110 miles south east of Manila when the collision occurred. Only twenty-six people survived the incident (see Lives Lost Category).

Six crew members were killed following a collision between two tankers in the River Seine. The Greek flag VITORIA (9,116 gross tonnage, built 1964) exploded and was sliced in two after collision with the Japanese flag FUJOH MARU which had sustained rudder damage prior to the incident.

The largest ship lost in this category was the Kuwaiti general cargo ship QAROUH (15,446 gross tonnage, built 1978) which was damaged by collision with a bulk carrier. The general cargo ship subsequently sank two days later after flooding of the cargo holds.

Contact Seven ships were lost during the year, amounting to 21,341 gross tonnage: a decrease of 10,264 gross tonnage over the figure for 1986. Fifty-three per cent of tonnage in this category was accounted for by the loss of two general cargo ships when typhoon Thelma pounded the Korean peninsula. The Pakistan flag WARSACK (9,739 gross tonnage, built 1968) struck a wharf at Ulsan after mooring lines parted. The second ship lost, was the South Korean general cargo ship CHUN YANG (1,596 gross tonnage, built 1981) which struck a quay and sank at Busan.

Wrecked/Stranded The number of ships lost in this category again showed a decrease with a total of just forty-three, the lowest ever recorded. Tonnage lost fell to 298,209 gross tonnage compared with 528,256 gross tonnage in 1986 (51 ships).

The largest ship lost was the South Korean bulk carrier HYUNDAI NEW WORLD (101,486 gross tonnage, built 1986) which grounded whilst anchoring off Sao Luis de Maranhao, Brazil. The 199,483 deadweight vessel, carrying 190,000 tonnes of iron ore and coal from Baltimore to South Korea, represents thirty-four per cent of all tonnage lost in this category. This is the second successive year in which a South Korean vessel has featured as the largest loss in this particular section.

In December the Danish passenger/general cargo ship, NELLA DAN (2,186 gross tonnage, built 1961) stranded on rocks in Buckles Bay, Macquarie Island whilst unloading. Most of the crew members were ashore assisting discharge when the vessel dragged anchor and beached. At first it was decided to salvage her but detailed inspection revealed she was badly holed. She was taken into the bay for scuttling but caught fire and sank taking valuable salvage and scientific equipment with her.

Four vessels in this category were lost during Typhoon Thelma, two stranded at Busan and two at Yosu. The steam tanker MANHATTAN (USA flag, 62,434 gross tonnage, built 1962) had been laid up at Yosu at the time of the incident.

Lost, etc. This year has seen a further escalation in attacks on merchant shipping due to the Iran-Iraq conflict, although the tonnage lost in this category during 1987 was only twenty-five per cent of the total tonnage lost through casualty. (Hostilities between these two nations accounted for nearly fifty-seven per cent of all tonnage lost in 1986.) Eight vessels, amounting to 324,777 gross tonnage were claimed by the conflict, four tankers, one ore/bulk/oil carrier, two supply ships and a research vessel.

Two tankers over 100,000 gross tonnage were lost during the hostilities; both were steam tankers. The Cypriot flag LADY A (114,086 gross tonnage, built 1975) was struck by a missile 60 miles south of Kharg Island and the Greek flag TACTIC (105,422 gross tonnage, built 1974) whilst laden with crude oil, was struck by a missile 115 miles south of Kharg Island.

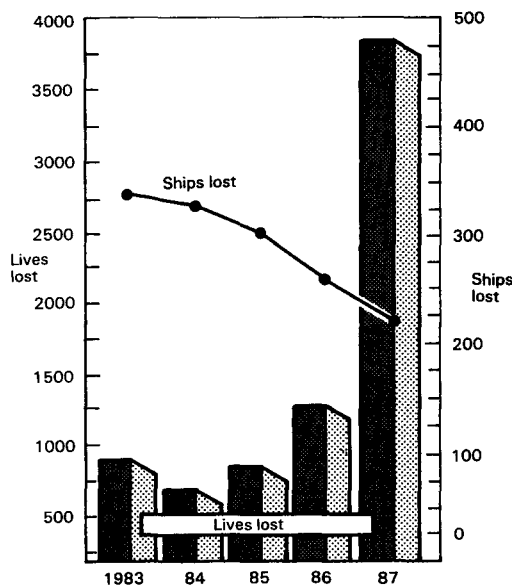

Distribution The geographical distribution of total losses during the year is shown on pages 10 and 11.

Types The total number of 219 ships lost during 1987 included 12 oil tankers, gross tonnage 357,707 (27.8 per cent), 18 ore/bulk carriers, gross tonnage 521,648 (40.6 per cent) and 51 fishing craft. One hundred and five general cargo vessels were lost, accounting for 331,618 gross tonnage (25.9 per cent). (For an analysis of losses by type see Table 3).

Size Nearly forty-nine per cent of ships lost were under 500 gross tonnage. Twenty-eight ships with a gross tonnage of 10,000 and above were lost, of which only three were over 100,000 gross tonnage.

Age Fourteen per cent of all ships lost were less than ten years old; over eighteen per cent were twenty-five or more years of age. Four vessels completed during 1986 were lost, two general cargo, one fishing and the bulk carrier HYUNDAI NEW WORLD (KRS flag) which was less than four months old when she stranded on the Brazilian coast.

Lives Lost The number of persons reported killed or missing as a result of total losses are indicated below for the years 1983-1987. The figure for 1987 (3,841) shows an increase of 2,774 from last year.

The greatest loss of life occurred when the Philippine ferry/general cargo ship DONA PAZ (2,324 gross tonnage, built 1963) caught fire after collision with the Philippine tanker VECTOR (629 gross tonnage, Built 1980). The Philippine National Bureau of Investigation claimed that there were 3,099 passengers and 59

crew on board the ferry. Eleven lives were lost on the tanker which was also engulfed following explosion and fire. Only twenty-six people survived the incident. It is unlikely that a true death toll will ever be known but it is believed, this incident is the worst ever peacetime loss of life on a merchant ship. This is the sixth consecutive year in which a Philippine ferry has featured in this section of the notes.

The second highest loss of life occurred when the British passenger/ro-ro cargo/ferry HERALD OF FREE ENTERPRISE capsized in shallow water off the entrance to Zeebrugge with the loss of one hundred and ninety-three persons. It is believed that fatalities would have been much greater had the vessel not been so close to port.

Ten ships sustained twenty or more human casualties during 1987. Of the 219 total losses, fifty-four incidents recorded some loss of life. Lives lost by category for the last five years are shown below.

Registration Japan, Panama, and Korea (South) suffered the highest number of ships lost, with 24, 23, and 14 respectively. Cyprus suffered the highest gross tonnage loss with 193,165 followed by Greece with 155,503. Other registrations sustaining losses over 100,000 gross tonnage included South Korea (147,711), Panama (141,634) and Liberia (108,053).

Total losses for countries whose merchant fleets totalled more than six million gross tonnage are shown below with comparative figures for 1986 shown in parentheses. Further comparisons can be obtained from Table 5.

Summary of ships Broken up, etc., reported during 1987

Tonnage broken up reported during 1987 decreased by 8,279,030 to a figure of 12,008,712 gross tonnage and is the lowest total since 1981. The number of vessels involved (1,474) is 414 fewer than that recorded for 1986. Comparisons over a period of fourteen years are shown at the end of Table 1.

The largest ship broken up during the year was the Panamanian flag steam tanker TEXACO IRELAND (143,685 gross tonnage, built 1972). The VLCC had previously been laid up in the Johore River since 1982.

The oldest ship reported broken up during the year was the Spanish steam ferry RUZAF A (228 gross tonnage, built 1905). One interesting disposal was the U.S.S.R. steam passenger/general cargo ship BALTIKA (7,494 gross tonnage, built 1940) acquired by Pakistani breakers. Highlights of the ship's career included transporting the Soviet leader Krushchev to New York in 1960 and acting as an accommodation vessel in Reykjavik during the Gorbachev-Reagan summit in 1986.

Countries sending most tonnage to the breakers during the year were as follows:

	Gross tonnage
Japan	2,004,106
Panama	1,939,993
Liberia	743,919
India	728,811
Greece	674,084
U.S.S.R.	491,780
Cyprus	472,393
Malta	469,283
United States of America	415,687
Saint Vincent	408,238
China, Republic of (Taiwan)	396,262
Korea (South)	347,799
Philippines	252,842
Gibraltar	219,778
Italy	203,146

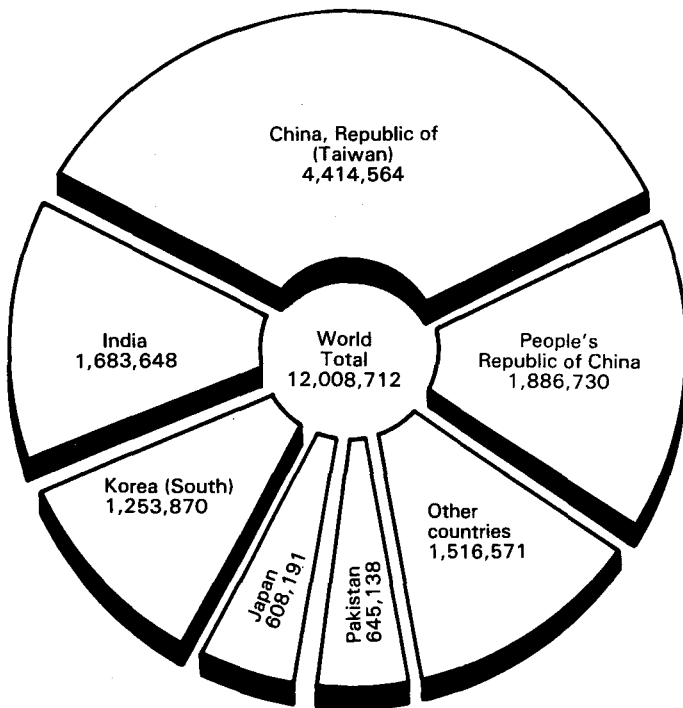

The Republic of Taiwan maintained its position as the principal place of disposal, taking over thirty-six per cent of all tonnage. Tonnage taken in this region decreased by 3,358,886 gross

tonnage, with seventy-seven fewer ships than recorded for 1986. This is expected to fall still further in 1988 as many of the demolition sites will be closed to allow port expansion at Kaohsiung. The People's Republic of China took less than two million gross tonnage for the first time since 1983. One hundred and forty fewer ships were demolished on the mainland in 1987, and gross tonnage broken up decreased to 1,886,730. The People's Republic remained in second place demolishing 15.7 per cent of all tonnage. It is probable that higher scrap values may be responsible for the decline in this region.

India emerged in third place, more than doubling its 1986 tonnage total to 1,683,648 gross tonnage (137 ships), which was 14 per cent of the world market. Korea (South) fell back to fourth place with 10.4 per cent (61 vessels). These were the only countries to demolish more than one million gross tonnage.

Pakistan and Japan each took just over 5 per cent of all tonnage demolished. Japan took twenty-four fewer vessels than recorded in 1986, mostly small domestic tonnage. Thailand and Indonesia failed to maintain the momentum shown in 1986. Spain and Turkey both took just over 1 per cent with similar tonnage totals for 1987. Only five countries demolished more than 100 ships.

Principal places of Disposal (showing gross tonnage broken-up)

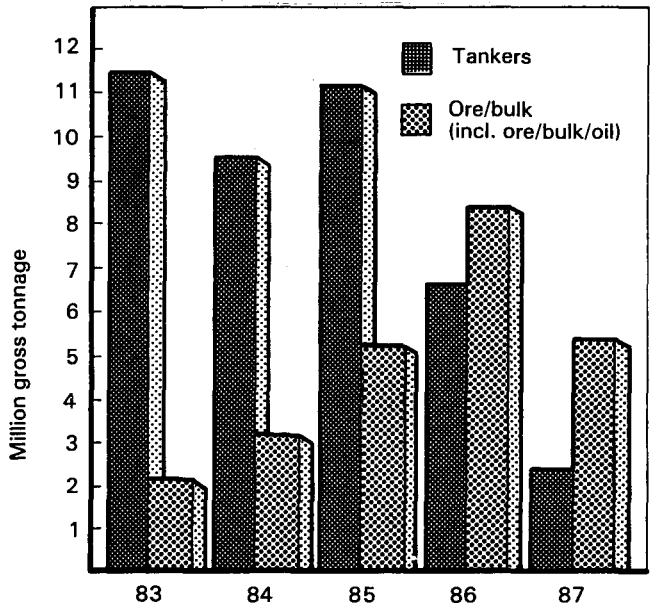

Tanker tonnage disposed of (2,458,293 gross tonnage) amounted to 20.5 per cent of the total sold for demolition, compared with 33.7 per cent in 1986. The average size of tanker broken up was 19,986 gross tonnage. Eight tankers of 100,000 gross tonnage and above were broken up during the year: all were steamships. High replacement values for new tonnage coupled with an upturn in the tanker trade may account for the dramatic decline in disposals. Laid up tanker tonnage is also at its lowest level for several years.

Bulk carrier tonnage sold to breakers is again higher than tanker tonnage. Two hundred and forty-one ore/bulk carriers were

demolished during the year, one hundred and forty-four fewer than in 1986. Ore/bulk carriers disposed of (5,579,495 gross tonnage) amounted to 46.5 per cent of the total. Comparisons between tankers and bulk carriers broken up over a period of five years can be seen below.

Tankers and Bulk Carriers Broken up, etc., 1983-87

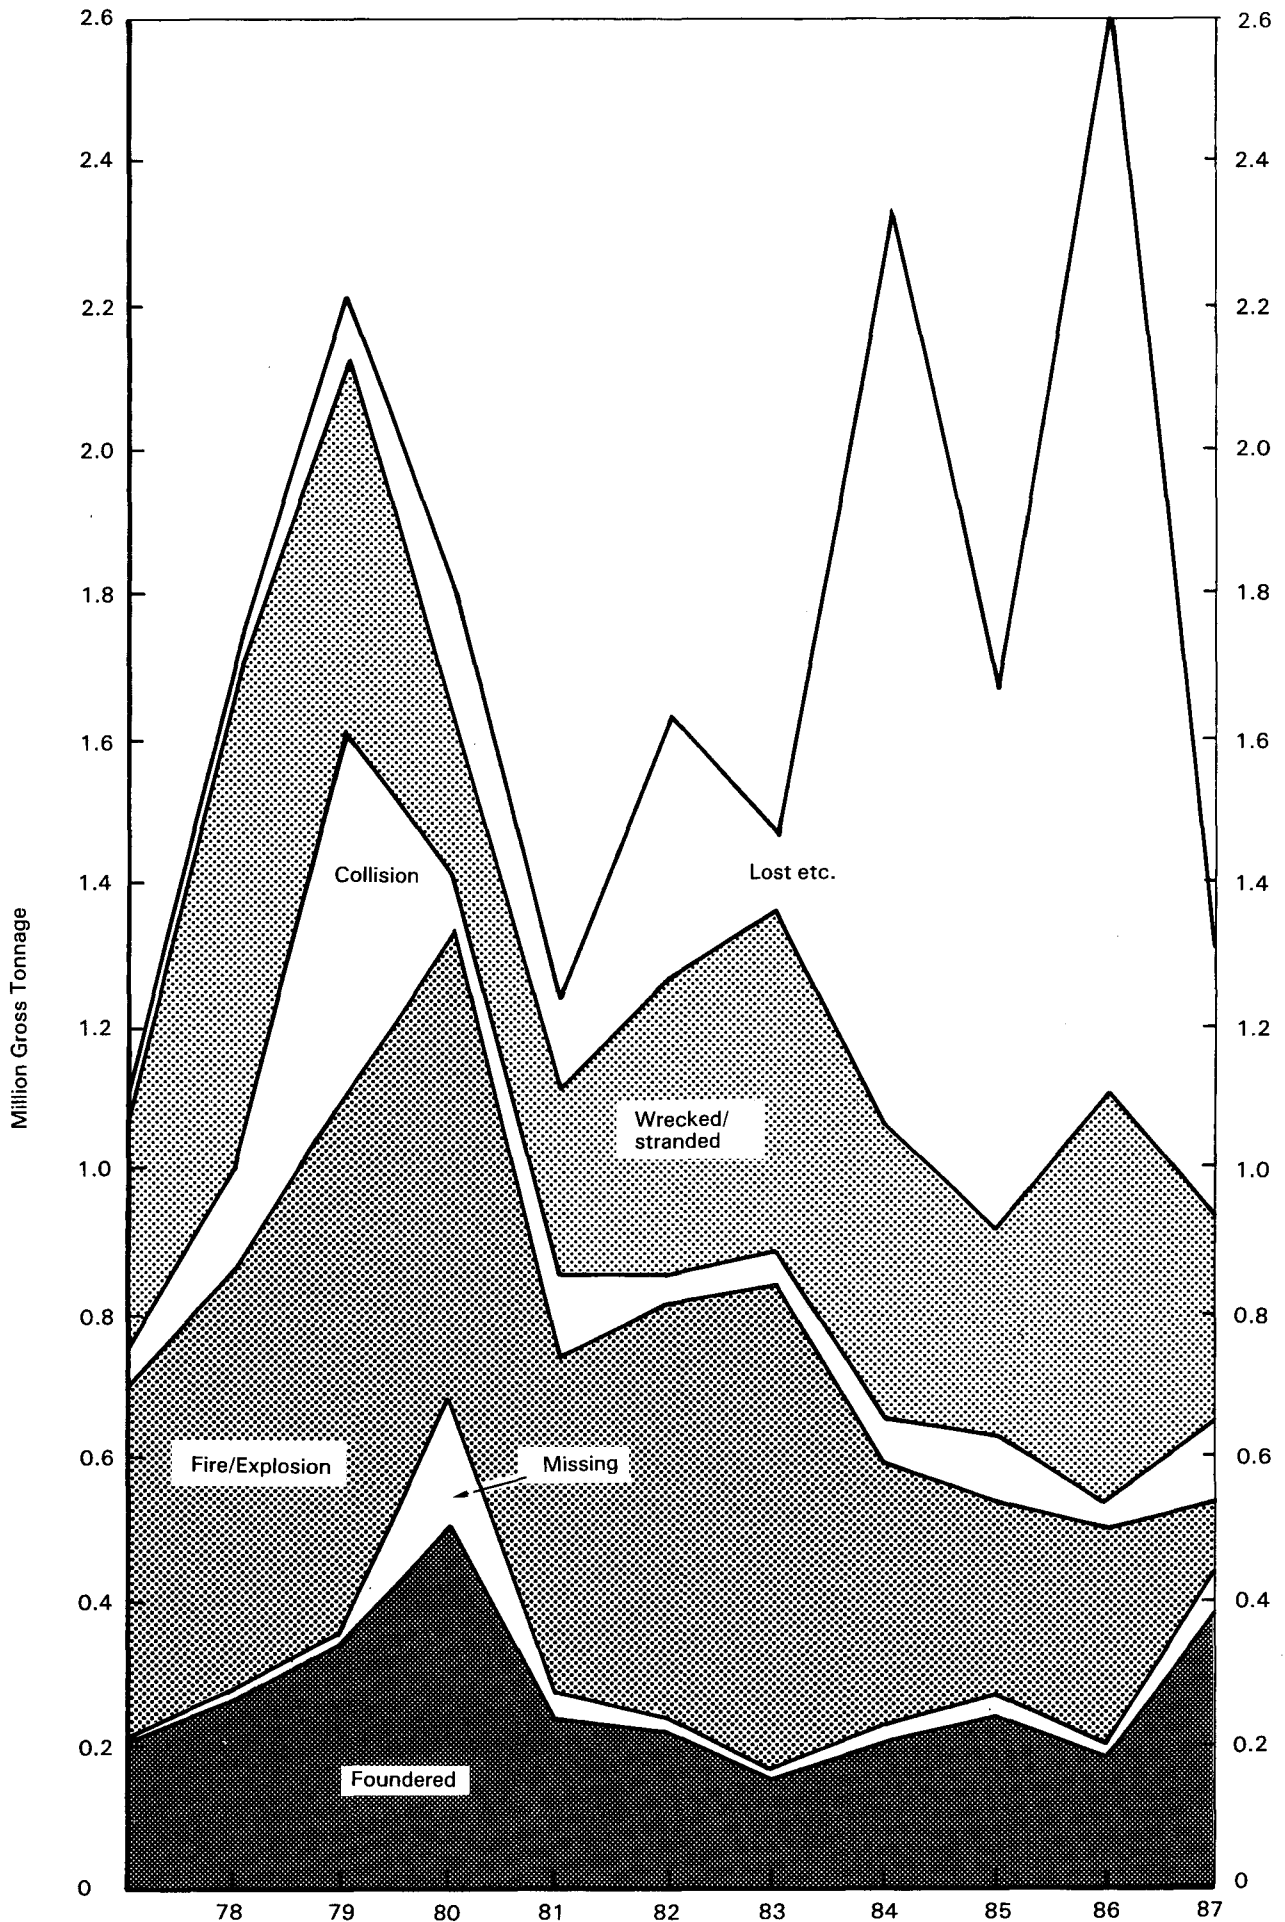

Tankers = 2,458,293 gross tonnage

Ore/bulk = 5,579,495 gross tonnage

Six-hundred and fifty-seven general cargo ships were broken up, a decrease of 148 compared with 1986. Sixty-eight per cent of these were twenty years old or more.
